Tools

- PHP
- MySQL
- Postman
- WampServer (windows)
- XAMPP (Multi-OS)
- MAMP (MAC)
- LAMP (linux)
- phpMyAdmin

Instructions

The goal of this project is to make a e-commerce website.

Create a repository `e-commerce-PHP`. Put all of your files in this folder.

And you will use the database you created during the SQL pool for this project. If you database is not good or if you want to modify it, change it, ... it is entirely possible.

Project
